PROFESSIONAL EXPERIENCE

Cerins — **Luanda, Angola**
Software Engineer — **Jan 2025 - Present**

- Built and launched a self-funded technology startup delivering mobile and web-based applications.
- Led the design, development, and deployment of digital products from concept to production.
- Coordinated technical support and ongoing product development to ensure platform stability and growth.
- Drove innovation, operational efficiency, and digital transformation across products and processes.

Emirates Airlines — **Dubai-UAE**
Customer Experience (CX) - Data Analyst — **Mar 2022 - Oct 2024**

- Logged and maintained detailed records of customer interactions to support service quality and reporting.
- Used CRM systems to track and manage interactions for fast and accurate case resolution.
- Monitored system and app performance to identify trends and opportunities for software improvement.
- Extracted and analyzed operational data from Avaya and Genesys platforms to support business decisions

EJC Technology — **Cape Town-South Africa**
Junior Software Engineer — **Dec 2019 – Feb 2022**

- Refactored and optimized application code, improving performance, maintainability, and system stability.
- Developed and deployed new features based on business and user requirements.
- Worked closely with senior engineers and designers to enhance application usability and user experience.

Projects

- **EMA Org – Web Platform** [https://www.emaorg.com/]
  • Developed a dynamic, responsive website using TypeScript, React, and Next.js, enhancing user engagement and accessibility.
  • Integrated API-driven content management for seamless updates and improved site maintainability.
  • **Technologies**: TypeScript, React, Next.js, Tailwind CSS, Vercel.

- **Odonto-Care – Dental Services Platform** [https://odontocare-tan.vercel.app/]
  • Built a full-featured dental service booking site with TypeScript and React, streamlining appointment scheduling and client interaction.
  • Implemented reusable components and optimized state management, improving load times by 25%.
  • **Technologies**: TypeScript, React, Tailwind CSS, Vercel.

- **IM Profile – Personal Portfolio Site** [https://im-profile.vercel.app/]
  • Designed and developed a professional portfolio using TypeScript and React, showcasing projects with interactive features.
  • Applied responsive design principles and performance optimization for smooth user experience across devices.
  • **Technologies**: TypeScript, React, Next.js, Vercel, Tailwind CSS.

Languages

• English – Fluent
• Portuguese – Native
• French – Intermediate
